## **GHS Classification**

ID535

## m-Divinylbenzene

CAS 108-57-6 Physical Hazards

Date Classified: Sep. 20, 2006 (Environmental Hazards: Mar. 31, 2006)

Reference Manual: GHS Classification Manual (Feb. 10, 2006)

| Harris de la companya | 01:66                       | ar was la a l |             | harand statement | Defend for the sleep forter   |
|--|-----------------------------|---------------|-------------|------------------|---|
| Hazard class   | Classification              | symbol        | signal word | hazard statement | Rational for the classification   |
| 1 Explosives   | Not applicable              | -             | _           | -                | Containing no chemical groups with explosive properties   |
|  | Not applicable              | -             | _           | _                | Classified as "liquid" according to GHS definition  |
| 3 Flammable aerosols   | Not applicable              | -             | -           | _                | Not aerosol products  |
| 4 Oxidizing gases  | Not applicable              | 1             | -           | _                | Classified as "liquid" according to GHS definition  |
| 5 Gases under pressure   | Not applicable              | ı             | ı           | -                | Classified as "liquid" according to GHS definition  |
| 6 Flammable liquids  | Classification not possible | _             | _           | _                | No data available. The isomer mixtures including p- and o- (mixing ratio unknown) have the boiling point of 195degC and the flash point of 76degC (open cup flash test) (ICSC (1990)), whereas the boiling point of m-divinylbenzene is 199.5degC (185B) (2006)). According to some studies, "a good linear relationship is found between the flash points and the boiling points of the homologues, which indicates that the substance with a low boiling point generally has a low flash point" (Safety of Hazardous Substances, 2004). Based on this, the flash point of m-divinylbenzene is considered to exceed 76degC, which can be included in "Category 4." |
| 7 Flammable solids   | Not applicable              | _             | _           | _                | Classified as "liquid" according to GHS definition  |
| 8 Self-reactive substances and mixtures  | Classification not possible | -             | -           | -                | Classification not possible due to lack of data, though containing unsaturated bonds (olefin)   |
| 9 Pyrophoric liquids   | Classification not possible | -             | _           | _                | No data available. The isomer mixtures including p- and o- (mixing ratio unknown) have the flash point of 500degC (ICSC (1999)) and are considered non-pyrophoric when in contact with air at ordinary temperatures. m-divinylbenzene per se is also regarded non-pyrophoric when in contact with air at ordinary temperatures, and therefore "Not classified."   |
| 10 Pyrophoric solids   | Not applicable              | 1             | -           | _                | Classified as "liquid" according to GHS definition  |
| 11 Self-heating substances and mixtures  | Classification not possible | -             | -           | -                | Test methods applicable to liquid substances are not available.   |
| 12 Substances and mixtures, which in contact with water, emit flammable gases  | Not applicable              | -             | _           | _                | Containing no metals or metalloids (B, Si, P, Ge, As, Se, Sn, Sb, Te, Bi, Po, At)   |
| 13 Oxidizing liquids   | Not applicable              | _             | _           | -                | Organic compounds containing no oxygen, fluorine or chlorine  |
| 14 Oxidizing solids  | Not applicable              |               | _           | _                | Classified as "liquid" according to GHS definition  |
| 15 Organic peroxides   | Not applicable              | _             | _           | -                | Organic compounds containing no "-0-0-" structure   |
| 16 Corrosive to metals   | Classification not possible | _             | _           | -                | No data available   |

## **Health Hazards**
