Coming into Force

3 This Order comes into force on the day on which it is published in the *Canada Gazette*.

DEPARTMENT OF THE ENVIRONMENT

SPECIES AT RISK ACT

Description of Nuttall's Sheep Moth critical habitat in the Vaseux-Bighorn National Wildlife Area and Vaseux Lake Bird Sanctuary

The Nuttall's Sheep Moth (*Hemileuca nuttalli*) is listed on Schedule 1 of the *Species at Risk Act*. In Canada, the Nuttall's Sheep Moth is restricted to the Antelope-brush habitat within the south Okanagan Valley of British Columbia.

The recovery strategy for the Nuttall's Sheep Moth identifies the critical habitat for the species in a number of areas, including within federally protected areas.

Notice is hereby given that, pursuant to subsection 58(3) of the *Species at Risk Act*, subsection 58(1) of that Act will apply, 90 days after this publication, to the critical habitat of the Nuttall's Sheep Moth identified in the recovery strategy for that species — that is included on the Species at Risk Public Registry — that is found within the Vaseux-Bighorn National Wildlife Area and Vaseux Lake Bird Sanctuary, described in Schedule 1 of the *Wildlife Area Regulations* made pursuant to the *Canada Wildlife Act* and in the schedule to the *Migratory Bird Sanctuary Regulations* made pursuant to the *Migratory Birds Convention Act, 1994*.
