

List of toxic substances managed under Canadian Environmental Protection Act

The List of Toxic Substances in Schedule 1 of the *Canadian Environmental Protection Act, 1999* (CEPA (Canadian Environmental Protection Act) 1999) includes substances that are considered to be toxic as defined in Section 64 of the Act. The Government of Canada has the authority to regulate and authorize other instruments to prevent or control the use and/or release of these substances. Substances are added to Schedule 1 of CEPA (Canadian Environmental Protection Act) 1999 by the Government of Canada based on the Ministers of Environment and Health's recommendation.

To reduce the impact of Schedule 1 substances on the environment and human health, Environment and Climate Change Canada and Health Canada are responsible for developing and implementing regulations or other instruments that will prevent or control their use and/or release.
