

ENVIRONMENTALLY HAZARDOUS SUBSTANCES IN MALAYSIA.

Specifications for **Environmentally Hazardous Substance** can be found on the website of the Malaysian Department of Environment (DOE):

<https://myehs.doe.gov.my/>

The **Environmentally Hazardous Substances Notification and Registration (EHSNR) Scheme** is a voluntary scheme managed via the MyEHS Portal. It establishes the *Malaysian EHS Reference List*, which currently reflects 290 notified substances.

The scheme requires importers and manufacturers to notify environmentally hazardous substances placed on the Malaysian market, with information on identity, use, hazard classification, and volumes managed by DOE.

For further guidance, also refer to *Guidance for the Industry on the Notification and Registration Scheme of Environmentally Hazardous Substances (EHS) in Malaysia* under **Product Safety – Dangerous Toxic Substances – General**.
